### **DETAILED ACTION**

I. Rejection of claims under 35 USC 102(e) and 103(a) over Dujardin and/or Ashida will not be maintained in light of amendment filed 1/6/04. Applicant is correct in that resins and polymers are not defined as waxy media or waxy components.

Applicant's arguments, see amendment, filed 1/6/04, with respect to the rejection(s) of claim(s) under 35 USC 102(e) and 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of prior art below.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4,5,7,20,21 are rejected under 35 U.S.C. 102(b) as being anticipated by Hink et al (US 4933371; 6/12/90). Hink teaches an insecticide composition for controlling mosquitoes comprising linalool plus sesame oil (waxy component) or citric acid (waxy component). See abstract, column 6 lines 16-61, column 7 lines 32-41, column 9 lines 28-42, column 12 lines 43 – column 13 line 20.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1616

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2,3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hink as applied to claims 1,4,5,7,20,21. See 35 USC 102(b) rejections above. Hink teaches all that is recited by claims 2,3 except for the composition comprising the instant amount range of linalool. One having ordinary skill in the art would have been expected to determine the optimal amount of linalool. One would have been motivated to do this in order to develop a composition that would have been most effective in controlling mosquitoes.

#### ***Claim Objection***

Claims 22-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not disclose fan evaporation, ionic dispersion, atomization of the instant compound. The elected composition comprising linalool in a waxy medium is taught by the prior art. See art rejections above.

#### ***Telephonic Inquiry***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton N. Pryor whose telephone number is 571-272-0621. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m..

Art Unit: 1616

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
